

SIGNS OF LIFE – A TRIBUTE TO PINK FLOYD

Pink Floyd: magical words for generations of fans and musicians. Since three decades this band has become synonymous for a unique and mystical style of music. Probably no other band has had a more enduring impact on most areas of the musical scene.

For this tribute album "SIGNS OF LIFE", 21 bands from all continents have gathered and have recorded their favorite Pink Floyd songs. All these tracks are much more than just a copy of the original, each band has added its own unique spirit to give the songs a totally new perspective.

Besides the all-time classics such as 'Another Brick In The Wall', 'High Hopes', 'Wish You Were Here', 'Comfortably Numb' and 'Shine On You Crazy Diamond', the album also contains some of the earlier more psychedelic songs from the band's first decade, e.g. 'Interstellar Overdrive' and 'One Of These Days'.
